

Children's Day Celebration

The School of Rehabilitation and Behavioral Sciences (SRBS) celebrated Children's Day on 13 November with a lively and inclusive Jungle Theme, creating a cheerful atmosphere for special children. The speech therapy unit was beautifully decorated with forest elements, making the space immersive and visually engaging. Students from various departments contributed actively — BASLP 1st years presented rhymes, M.Sc. 1st years narrated stories, and interns conducted interactive activities designed to improve participation and enjoyment.

Children enthusiastically showcased their talents through solo singing and Thirukkural recitation, receiving encouragement and applause from the audience. One of the highlights was a delightful fashion walk, featuring creative costumes, including a standout participant dressed as a peacock. The event concluded with gift distribution, bringing smiles and joy to every child. The celebration was meaningful, memorable, and reflected SRBS's commitment to fostering happiness, creativity, and inclusivity among children.
