

Audiology awareness week

Having difficulty
in hearing?
You may have:

- AGE-RELATED HEARING LOSS
- CONGENITAL HEARING LOSS
- NOISE-INDUCED HEARING LOSS
- OTOTOXICITY (CAUSED BY DRUGS OR CHEMICALS)

SYMPTOMS:
HEARING DIFFICULTY,
RINGING SENSATION,
SENSITIVITY TO SOUND,
LEAD YOU TO ISOLATE
YOURSELVES BECAUSE OF
INABILITY TO COMMUNICATE.

check your hearing acuity
regularly just like
cholesterol level and blood
pressure

Safe level :

You can listen to sounds at 70 dB. But more than 85 dB can lead to hearing loss if you listen for more than 8 hours.

BY STUDENTS OF AVMC :

BATCH 2019 - 2023
